

## Senior Project Manager Space/Space Application (m/f/d)

### About us:

The Bavarian aerospace industry comprises more than 550 companies and institutions with over 40,000 employees and a turnover of more than €11 billion.

bavAIRia is a registered association based in Gilching, Germany, which has been commissioned by the Bavarian State Government to manage the Cluster Aerospace. The aim of bavAIRia e.V. is to identify Bavarian core competencies in aerospace, space, and space applications and to network the key players more closely in order to enhance the global competitiveness of these sectors. The members and stakeholders of bavAIRia e. V. represent the entire industrial and research landscape of the Free State of Bavaria.

### Your tasks:

You will support the Space & Space Applications division in the acquisition, implementation and execution of various national and European projects and take on activities within the framework of the cluster in the areas of space and space applications and report to the director of the Space & Space Applications department. Furthermore, you will perform the following tasks in consultation with the division management:

- national and European Projects:
  - acquisition, implementation, and management of new projects to be recruited
  - support of current projects in the field of space applications: Market analyses, organisation, and implementation of events as well as participation in exhibitions and events, communication, contacting and support of stakeholders, development, and implementation of events to advise and accompany companies
- Copernicus Office Bavaria:
  - attend and organise meetings
  - organisation and implementation of events related to Copernicus
  - providing support and advice to Copernicus stakeholders
- attending Space and Space Application exhibitions and conferences
- development and implementation of activities and events in support of the Bavarian space & space application stakeholders

### Your Profile/Your Qualifications:

You are:

- a team player
- sociable, possess fluent conversational and negotiating skills (also in English) with an engaging and convincing demeanour and can master even difficult conversational situations with tact
- able to work responsibly and independently
- flexible in terms of time and open for new processes and developments

You possess:

- ideally a degree in natural sciences or engineering (geodesy, space technology, or similar)
- sound experience in project acquisition and project management
- experience in EU and/or ESA projects related to satellite navigation, Earth Observation, or space applications as well as in international cooperation
- experience in the implementation and organisation of events
- a high degree of self-motivation, technical understanding, and organisational skills

- a very good command of both written and spoken English
- analytical skills and work result-oriented

**We offer:**

- a challenging and varied field of activity
- a pleasant, high-performance, and creative team with flat hierarchies and a positive working atmosphere with flexible working hours
- a permanent full-time position starting immediately
- The remuneration is based on TV-L.

We look forward to meeting you.

Please send your application stating your earliest possible starting date to: [jobs@bavAIRia.net](mailto:jobs@bavAIRia.net), bavAIRia e.V., Friedrichshafener Str.1, 82205 Gilching
